

Weekly Weather Crop Report

In cooperation with

Mississippi Department of Agriculture and Commerce

Week Ending April 7, 2002

Phone:601-965-4575 Facsimile:601-965-5622 www.nass.usda.gov/ms/ nass-ms@nass.usda.gov/

Released: 3:00 P.M., April 8, 2002

According to the Mississippi Agricultural Statistics Service, there were 3.8 days suitable for fieldwork for the week ending April 7, 2002. Some producers across the State are hoping for more sunny days so they can continue corn planting and other fieldwork. Soil moisture was rated 3 percent short, 50 percent adequate and 47 percent surplus.

F	Progress In Per	Conditions in Percentages									
Item	Event	This Week	Last Week	2001	5-Yr Avg	Very Poor	Poor	Fair	Good	Excellent

County Agent Comments

"We missed the last rain and producers on high ground are back in the fields. Farmers need a couple of dry weeks to get corn planted and get fields ready for other crops."

-Mack Young, Quitman County

"The most action you saw in the fields last week were tractors running some sort of water furrow plow, trying to drain all the excess water. It's getting pretty late for planting corn. Without a farm bill, and with high cost of production, low crop prices and soggy fields, morale is running pretty low right now."

— Jimbo Burkhalter Tallahatchie County

"Wet fields continue to hamper producers from doing any work. Wheat is looking much better. Pastures are slowly improving."

—Dalton G. Garner, Prentiss County

"Ground is completely saturated with water from recent rains. Farmers are ready to begin planting as soon as weather permits."

— Tim Needham, Tippah County

"Excellent progress was made with corn planting during the latter part of the week. Some soybeans and rice were also planted. Rain started falling again early Monday morning, eliminating most all field work for the coming week."

— Jerry Singleton, Leflore County

"Crops are going in slowly partially because of inclement weather and partially because many producers are still having trouble showing how they can cash flow to lending institutes."

-Tim W. Pepper, Yazoo County

"It's still raining as I submit this report this morning (Monday). The wet conditions are prohibiting field work and will force some farmers to consider alternative crops as it will be too late to plant corn if it doesn't quit raining soon. Livestock and winter forages are doing good. Summer forages are coming on strong lately."

-Houston Therrell, Rankin County

"We are still hoping to see some SUNSHINE. Farmers are unable to get much field work done because heavy and frequent rains are keeping us out of the fields."

-Bill Maily, Hinds County

This publication is part of a series that first began in 1872 and continuously published since. In Mississippi, this report is a result of the cooperative efforts of:
